**FOR IMMEDIATE RELEASE**

**NEW HVAC INSTALLED FOR SAFER INDOOR SCREENINGS**

**Orlando, FL** – (February 18, 2021) – Enzian Theater, in a continued effort to enhance safety for patrons and staff amidst COVID-19, has just installed a brand-new HVAC unit with UV filtration.

Features of the new A/C unit are designed to eliminate risks by reducing odors, air pollutants, smoke, mold, bacteria, and viruses. Guests can expect higher Ionized Hydro-peroxide output, which gives faster kill rates for microbials in the air as well as on surfaces. Also, this higher output is expected to bring relief to those who suffer from allergies and other respiratory issues.

"As guests begin to return to the movies, we want to ensure we've done all we can to make their in-theater experience safe and inviting," said Janie Pope, Director of Development and Public Relations. "We've been open since June, but we know not everyone has been ready to come indoors. As more vaccines become available, and Oscar-contenders such as [Nomadland](#) (opening this Friday), [Minari](#), and [The Father](#) roll out this month and next, we hope to see more attendees, and are very pleased the installation of our new HVAC coincides with the arrival of these award-winning films."

The theater continues to abide by CDC and Orange County recommended guidelines, operating at 50% capacity, with socially distanced seating. Eden Bar, Enzian's outdoor restaurant and craft Tiki cocktail bar, is also open for lunch and dinner, with a newly enhanced patio and fountain area.
